

Applications

Global Therm's systems are designed to your specific operational, wind load and extreme hot and cold conditions. Our custom designs incorporate a choice of insulation materials, sheathings in various thickness, finishes and colors. Global Therm tank insulation applications are not limited to, but include the following:

APPLICATIONS

- Anhydrous Ammonia
- Asphalt
- Beverages
- BioDiesel
- Brewery
- Butane/Propane
- Fire Protection*
- Chilled Water T.E.S. systems
- Chemicals
- Ethanol
- Wastewater Treatment

Aesthetics is always a top priority in the design of our tank insulation systems since many of these tanks are in public view. We understand the importance of making these tanks pleasing to look at so they fit into the landscape around them. We use only metal sheathed systems offered in a variety of standard and custom colors. We also are unmatched in our attention to finishing details. On many projects we have worked closely with design architects to help create the look they required.

* We can design an insulation system that meets the National Fire Protection Association (NFPA) 22 standards.
