

# Product

**G**lobal Therm's insulation panels are manufactured to precise panel heights. Additionally, all deck panels can be cut and fabricated to match existing tank diameters.

All materials are marked indicating the exact location on the tank where they are to be placed upon assembly. On bolted-style tanks, all chime locations are cut out of insulation. All trim and segregated pieces are notched at Global Therm's facility. Materials required to install products are included in the comprehensive package, including all rivets, tapes, caulking, butyl sealants, strapping, cable connectors and all cables or rods. Global Therm shipments are shrink-wrapped for protection and palletized for ease of unloading upon arrival to the job site.

## PRODUCT ADVANTAGES

### • CONSTRUCTION

Using only the highest quality materials and construction standards results in exceptional products capable of withstanding any weather challenge.

### • COST

Our custom fit manufacturing design speeds the installation process and reduces costs.

### • TURNKEY

We offer every aspect of the total turnkey solution—project management, designing, engineering, erection, installation, insulation and finished product.

### • MAINTENANCE

Because the standing seam lock stays intact and is maintenance-free, there are no bolts, screws or other hardware to penetrate the seal.
