

Vertical Sidewall System

CONSTRUCTION

- 1 Tank shell
- 2 Anchor cable
- 3 Retaining clip
- 4 Thermal Insulation
- 5 Metal jacket
- 6 Machine-formed, double locking standing seam

Global Therm's vertical sidewall system consists of a foil-faced isocyanurate foam insulation laminated to a stucco embossed polyester paint finish aluminum outer sheathing. Each standing seam is 24" wide with lengths up to 53'. Our design allows us to accommodate any tank height. The insulation panels are secured to the tank by an internal cable and clip system that is secured within the standing seam of each panel.
